SERIES
Executive Briefing

FINANCIAL PERFORMANCE

Global SaaS Revenue & Cloud Expansion

Accelerating enterprise adoption across Americas, EMEA, and APAC

RISK GOVERNANCE

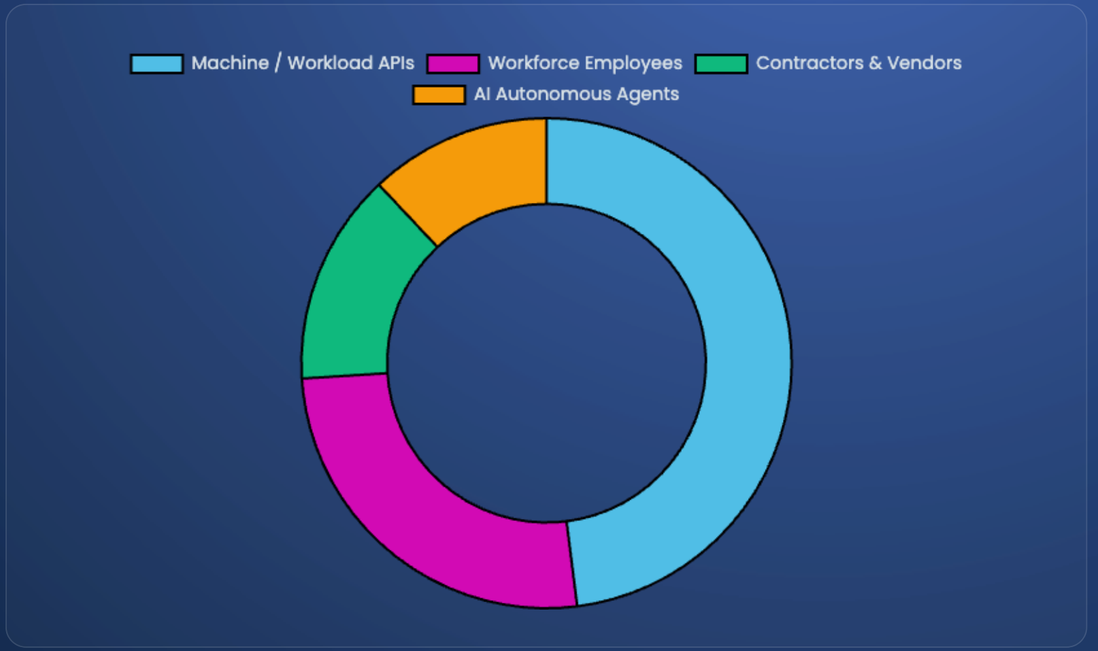

The Shifting Identity Perimeter

Non-human identities now constitute the majority of enterprise access requests

Non-human service principals and API tokens grew 310% YoY, outpacing workforce growth 4:1.

Autonomous agent credentials require just-in-time (JIT) ephemeral rotation to prevent persistent lateral movement.

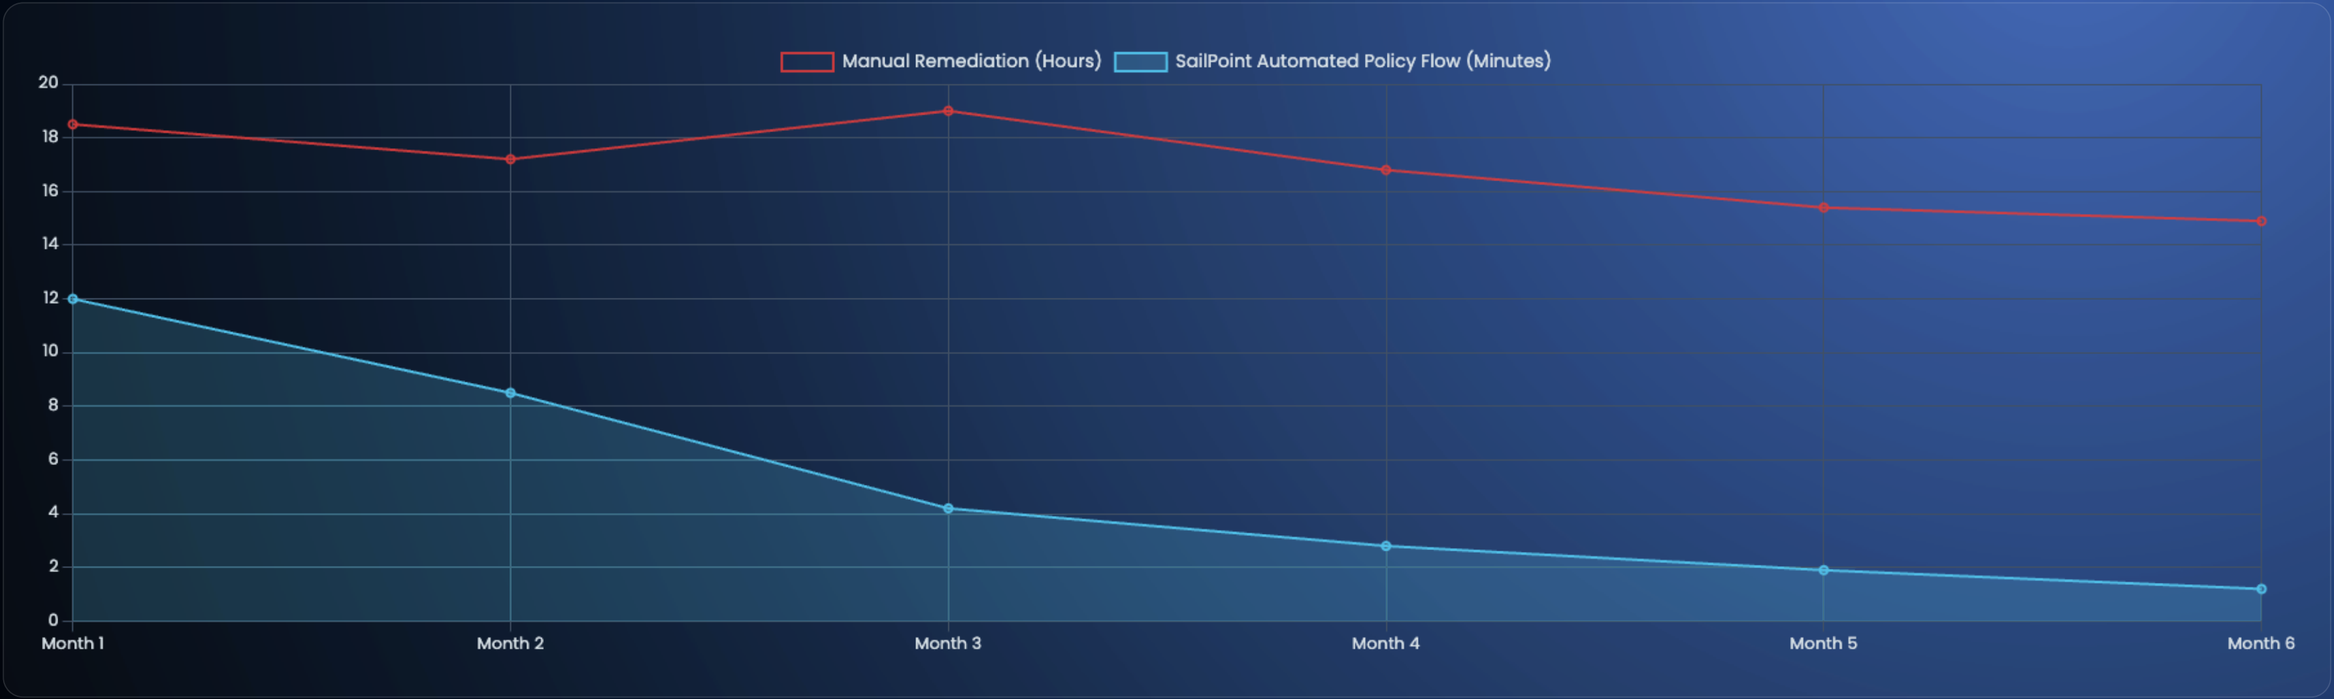

Contractor accounts without active MFA enforcement remain the top vector for unauthorized SaaS privilege escalation.

OPERATIONAL EFFICIENCY

Mean Time to Remediate (MTTR) Privileged Drift

Automated agentic remediation vs. manual SOC triage

KEY TAKEAWAYS

Strategic Impact & 2027 Horizon

Core outcomes enabled by unified identity security

94%

MTTR Reduction

Down from 18.5 hrs to 1.2 mins

$133M

Enterprise ARR

+38% YoY growth

100%

Machine API Coverage

Continuous Zero Trust posture
