SailPoint

SAILPOINT 2026 VISION

Autonomous Identity Security

Unified governance, privileged access, and threat intelligence in a single plane.

SailPoint Product & Architecture Strategy

KEY PERFORMANCE INDICATORS

Platform Scale & Impact

Measurable efficiency gains across global enterprise deployments.

99.98%

Governance Uptime

Tier-1 enterprise SLA

10x

Faster Access Reviews

Powered by autonomous ML

-64%

Identity Breach Exposure

Zero-trust containment

CORE CAPABILITIES

Pillars of Autonomous Governance

End-to-end intelligence from entitlement discovery to risk mitigation.

CONTEXT

Identity Graph

Dynamic map of human, machine, and SaaS credentials correlated in real-time.

AUTOMATION

Policy Orchestrator

Zero-touch provisioning and de-provisioning driven by business rules.

PROTECTION

Threat Sentinel

Continuous anomalous entitlement detection with automated step-up containment.

TRANSFORMATION

Traditional IAM vs. Autonomous Security

Shifting from quarterly manual audits to continuous machine-speed validation.

QUARTERLY & MANUAL

Legacy IAM

- Manual spreadsheet access certifications
- Stale orphan accounts and permission sprawl
- Fragmented visibility across multi-cloud accounts
- Delayed revocation taking days or weeks

CONTINUOUS & AI-DRIVEN

SailPoint Autonomous

- Machine-learning micro-certifications
- Instant orphan identification and auto-revoke
- Unified single-pane visibility across all clouds
- Sub-second session termination on threat detection

ARCHITECTURE

Cloud Topology & Extensibility

Modern multi-tenant SaaS foundation with developer-first extensibility.

SaaS Control Plane

- Distributed microservices across global regions
- Multi-cloud telemetry ingestion via streaming Kafka
- High-throughput graph database for entitlement trees

Extensibility Ecosystem

- Open REST and GraphQL APIs for all capabilities
- Webhooks and event-driven trigger actions
- Pre-built connectors for 300+ SaaS applications

ACTION PLAN

Secure Every Identity. Protect Every Access.

Next Steps: Production Pilot & Security Architecture Assessment
